READING THE DATA:

The screenshot displays the IBM Cognos Analytics with Watson web application interface. The browser's address bar shows the URL `us3.ca.analytics.ibm.com/bl/?perspective=home`. The application header includes a search bar and a user profile icon. A notification banner at the top indicates that a file named `final_train_data [1].csv` is being read. The main content area features a welcome message: "Hello. Welcome to Cognos Analytics with Watson." Below this, there are two buttons: "Watch video" and "Take a product tour". To the right, there is a 3D visualization of data cubes. A "Quick launch" section provides four main workflow options: "Upload data" (with a description: "Upload or drag-and-drop spreadsheets, csv files, and other data sources."), "Prepare data" (with a description: "Use data modules to clean and connect data from multiple resources."), "Exploration" (with a description: "Quickly find unbiased answers by identifying trends in your data with data exploration."), and "Present data" (with a description: "Create sophisticated, multi-page, multi-query dashboards, reports, or stories."). Below the quick launch section, there are tabs for "Get started" and "Recent". The "Recent" tab is active, showing a list of recent reports and data files, including "Analytics For Hospitals' Health-Care Data Report--1", "Analytics for Hospitals' Health-Care Data report", "wards", "DASHBOARD BUBBLE AND RADIAL", "BUBBLE AND RADIAL", "final_train_data.csv", and "final_test_data.csv". A "Show all" button is located at the bottom right of the recent items list. The Windows taskbar at the bottom shows the system clock as 17:37 on 18-11-2022, along with various application icons and a weather widget indicating 27°C and Haze.
