

PREPARATION OF CALCULATION:

The screenshot shows the IBM Cognos Analytics interface. The 'Create calculation' dialog box is open. The 'Name' field is set to 'available of room / bed grade'. The 'Expression' field contains the formula 'count(Available_Extra_Rooms_in_Hospital/Bed_Grade)'. The 'Components' list on the left shows various data sources and fields. The 'Information' tab is selected at the bottom.

OUTCOME OF THE CALCULATION:
